HISTORIC AMERICAN BUILDINGS SURVEY

GEORGE HALL HOUSE AND GARAGE

HABS No. AZ-173

Location:

Clifton Townsite, 140 Frisco Street, Clifton, Greenlee County, Arizona

Significance:

Associated with development of north Clifton. Typical example of residential architecture in Clifton between 1900 and 1920.

Description:

The George Hall house is buffered from the street by lush landscape in the front yard. A wood frame garage is accessed by way of an unpaved driveway to the rear of the property. A second story was added at an early date above the garage. The main house is one-story with a hip roof, with twin gablet dormer/ventilators. A bay window extends from the south side of the house. A wooden front entry porch is sheltered under the main roof. A modern aluminum awning has been added to the front porch. Exterior materials include beaded wood tongue-and-groove siding and asphalt shingle roofing. The windows are wood, double-hung type, with a two-over-two pattern.

History:

This frame building was constructed ca. 1898 by the Arizona Copper Company and was occupied by George Hall in 1908. Between the 1920s and the 1960s the building was occupied by Felix Brutinel.¹
